

CyraShift

Frequently Asked Questions

1. What is CyraShift?	CyraShift is a B2B database and lead generation company that provides targeted business contact data to help companies reach relevant decision-makers and build more effective prospecting campaigns.
2. What type of data is included in your databases?	Our databases can include company name, website, industry, NAICS/SIC codes, contact name, job title, business email, direct phone number, employee size, annual revenue, ownership type, company address, and geographic information.
3. How many industries do you cover?	CyraShift provides B2B data across 500+ industries, allowing businesses to build targeted prospect lists based on their specific market and customer profile.
4. Can I target a specific industry?	Yes. You can request databases for specific industries or business categories. We can also use industry classifications such as NAICS and SIC codes for more precise targeting.
5. Can I choose a specific location?	Yes. Geographic targeting can be based on country, state, city, ZIP code, county, or metropolitan area, depending on your requirements.
6. Can I target specific job titles or decision-makers?	Yes. Databases can be segmented by job title, department, seniority level, and executive responsibility so you can focus your outreach on relevant decision-makers.
7. Can you create a custom database for my business?	Yes. CyraShift can build a custom database by combining filters such as industry, location, company size, revenue, job title, and other business criteria.
8. Are the email addresses verified?	CyraShift uses a multi-level verification process designed to improve data quality, reduce invalid addresses, and help improve email campaign deliverability.
9. How frequently is the data updated?	Business information changes over time, so our data is regularly reviewed and updated as part of our quality-control and research process.
10. Can I download leads into Excel or my CRM?	Yes. You can easily download leads into an Excel-compatible .CSV file, or export leads directly to your CRM for a smoother prospecting workflow.
11. How quickly can I receive my database?	CyraShift focuses on rapid data delivery. Delivery time depends on the size and complexity of your requested database, especially for highly customized projects.

<i>12. Can I request a sample before purchasing?</i>	Yes. CyraShift provides a sample database so prospective customers can review the type and structure of information included before requesting a custom database.
<i>13. Who can benefit from CyraShift's databases?</i>	Our B2B data can support sales teams, marketing agencies, lead-generation companies, startups, established businesses, and other organizations that need targeted business prospect lists.
<i>14. Can CyraShift help with lead generation and email campaigns?</i>	Yes. In addition to B2B email lists and data verification, CyraShift offers lead-generation and email-campaign solutions designed to help businesses reach targeted prospects.
<i>15. How do I request a custom database or quote?</i>	Tell us your target industry, location, company size, job titles, or other requirements through the contact form. Our team can then review your requirements and provide a tailored database solution and quote.
